University of Warwick explains how and **why** to make Cornell Notes

Let's get ready
for college

- COMPLETE THE FOLLOWING TASK TO
GET READY FOR COLLEGE

READ the source below and CREATE Cornell notes

- Biology – ['What is life?'](#)
- You are practicing the skill of taking notes from a written source.

- Remember – it is the **SKILL** of making Cornell notes that you are developing.
- The subject **isn't important** at this stage, so stick with the biology example...the source is designed to be a bit challenging but not too much.

Big picture: establish what the whole source of writing is about (so look at the title and the first paragraph). This helps your understanding.

Key points: scan the headings and sub-headings before you read in detail.

This helps identify what might be important as key points to go in the left hand-side of your Cornell notes.

Be creative: use diagrams and underlining, colours, arrows and links

Be individual: do what works for you

Be selective: avoid copying out chunks of writing.

Skill: making selective notes isn't easy: you need to keep doing it until you get better.

It will be hard at first and you will be tempted to simply copy out chunks, as you normally do: that isn't helpful at all! Get out of that habit!

PREPARATION FOR COLLEGE

GET A FOLDER (ONE FROM A GCSE SUBJECT WILL DO)

THIS FOLDER IS TO KEEP THE WORK YOU NEED AS PART OF YOUR PREPARATION FOR COLLEGE

KEEP YOUR NOTES ON 'WHAT IS LIFE?' AND PUT THEM IN THE FOLDER SO YOU CAN REFER TO THE SKILLS LEARNED

At college and university, you need to be able to make notes from three main sources of information – **reading** (books and articles), just **listening** (podcasts), as well as **watching and listening** (videos and lectures).

Are you ready?

WHAT'S NEXT?

The next step is to make Cornell notes from listening and watching. **So you will be sent a video and a podcast to make notes on.** Crack note-taking and it's a major step forward!
